

OT815

Finger Touch

Choosing OT815 with our interactive projector such as AN-STi series, you can directly touch the projection screen with your finger without using IR pen. It is easier and more convenient for you to use interactive function.

AN-STi series

Installing Optical curtain upgrades to Finger touch function:

By installing optical curtain (optional part) on the top of the screen user can use finger to touch the interactive screen through USB signal connection without IR pen.
